

Garmin BlueChart® G2 Vision HD Small Area Charts

The BlueChart G2 Vision HD card contains high precision mapping, high resolution satellite images, true 3D view of both above and below sea waterline, fishing high depth and HD bathymetrics, "Safety Shading" function, seamless transition between map areas, Auto Guidance technology, aerial photos of all navigation landmarks and points of interest. Mariner's Eye View 3D perspective provides a bird's eye view from behind the boat showing the chart information for a quick, reliable and easy position fix to help you orient yourself in unfamiliar areas. It also provides an underwater view that visually represents the sea floor and this allows you to create the best route in order to avoid obstacles, shallow water, buoys and other obstructions.
